

# trinka tinker sheet

If you are tired of cheap, lightly built dinghies that are inadequately outfitted and sometimes downright dangerous, consider the many proven qualities that make **Trinka** a superlative yacht tender. We include all the features in every **Trinka** that we believe make a truly quality dinghy.

**Trinka's** standard features make her a reliable and rugged tender for any use. But we also recognize that

a skipper should be able to tailor his dink to precisely fit his individual requirements. This sheet will help you to decide which of our optional features are most important to you so that you can put your money exactly where you want it.

Your **Trinka** will give you many years of faithful service. We will work with you directly to make sure that you get the boat you want, the one you should have had years ago.
